About me

12 years of designing digital products at the intersection of banking, healthcare, rail transport, and security. I combine design craft with product strategy, Agile work, and GenAI integration in the design process. I lead teams from direction through delivery and design experiences in high-risk, regulated environments - where mistakes are costly. I work in English (C1), conversationally in German (B1), and I'm learning Japanese (A1).

Recent professional experience

May 2024 —
present

ING Bank Śląski: Business Banking

UX Expert - Interaction Design

- I design solutions for ING Business and Moje ING - from strategy to delivery. I focus on innovation (GenAI) and on simplifying complex banking processes for corporate clients.
- Phone-number transfer (B2B):** first corporate flow of its kind on the market - 1M transactions in week one, NPS 45.9, nominated for the 2025 Banking Leaders Award.
 - GenAI & AI Trek:** designing a GenAI assistant for business banking and co-creating the bank's AI rollout strategy.
 - ING International Guild:** co-shaping strategy and consistency of banking systems across the group.
 - Visual Identity:** redesigning ING interactions under new VI guidelines - visual coherence and product language.
 - Card and credit products:** flow improvements - higher usability and conversion.
 - Research & workshops:** facilitating research and creative workshops, including for complex back-office systems.

Jan 2023 —
Dec 2023

New Security Systems

Lead UX & UI Designer

- Lead of a 4-person team: I designed and commercialised a SaaS product for biometric reidentification (Face / Gait / Cloth) for critical infrastructure. Clients: LOT, Rossmann.
- Business outcomes:** 20% ROI within the first 6 months of deployment; rollout to 50+ locations in 60 days — ahead of the planned schedule.

Education

Master of Arts

Polish-Japanese Academy of
Information Technology, Warsaw
2020 - 2024

Google UX Design Pro Certificate
Google
2024

Tools

- Figma
- Adobe CC
- ProtoPie
- FigJam / Miro
- Notion
- GenAI tools
- HTML
- CSS
- JavaScript

Skills

- Strategic Design Thinking
- Stakeholder Management
- International Design Guild
- GenAI-driven Design Workflow
- AI assistant design
- Advanced Prototyping (Figma)
- User Research & Evidence-based Design
- Data-driven Design Decisions
- Workshop Facilitation (Design Sprints)
- HTML, CSS & JavaScript (basics)

Languages

Polish	Native

Japanese	A1

Jan 2023 —
Dec 2023

New Security Systems (cont.)

Lead UX & UI Designer

- **Operator trust:** 97% of operators trusted the new identification method in acceptance testing - the result of a Human-in-the-loop mechanism designed from an Empathy Map.
 - **Delivery pace:** the implemented Design System enabled the team to run 32 sprints / 180 days of iteration with no design debt.
 - **Strategy and clients:** won and retained contracts with market leaders (incl. LOT, Rossmann) through direct work with strategic partners.
-

Jan 2023 —
Jul 2023

TabBox

Lead UX & UI Designer

Lead of a 3-person creative team. A smart pillbox dispenser for seniors and patients with dementia - from concept through mass production.

- **Outcomes and scale:** 89% improvement in medication adherence in the test group and a 43% increase in product interest - translated directly into contracts with major Polish pharma players.
 - **Go-to-Market:** mass-production contract closed in 8 weeks; pilot launch in pharmacy chains following the premiere.
 - **Process optimisation:** redefined the team's creative process around in-depth patient needs analysis and interface design under medical regulation (HealthTech).
-

Apr 2021 —
Dec 2022

Infracert | VTDA

UX & UI Designer

Led the development of a train driver support system - architecture and UI delivered with the largest rail carriers in Central and Eastern Europe.

- **Safety and efficiency:** 21% reduction in railway incidents thanks to a redesigned alert hierarchy and telemetry-data analysis.
 - **International scale:** successful rollout of the first units onto the European market, system testing, and certification with key industry partners.
 - **Complex systems:** designing critical interfaces for high cognitive-load conditions and rigorous reliability requirements.
-

Recent projects and achievements

Jan 2024 —
Sep 2024

Hack the Climate - PFR

Lead UX & UI Designer

Creative team lead. A climate platform for the residents of Rzeszów - in cooperation with the city hall, based on qualitative research.

- **Competition result:** distinction in the Polish Development Fund (PFR) competition - driven by a complete product vision and a clear value narrative for the city.
- **Stakeholder management:** securing buy-in from city officials and opening conversations with further investors - through north-star vision presentations and high-fidelity prototypes.

Jan 2024 —
Sep 2024

Hack the Climate - PFR (cont.)

Lead UX & UI Designer

- **End-to-end delivery:** information architecture, user interfaces, and visual identity in one coherent system - deployment readiness achieved on schedule (May 2024).

Jan 2023 —
Jul 2023

PGZ Stocznia Wojenna - PFR

Lead Product Designer

A neural-network-based maritime anomaly detection system - in cooperation with the defence sector, under strict contractor requirements.

- **Operational deployment:** system architecture and UI tailored to field conditions - full operational deployment with the contractor.
- **External validation:** qualified for the IDA Bootcamp programme - independent confirmation of the technological maturity and strategic potential.
- **Deep Tech UX:** data visualisations from neural networks designed for instant anomaly interpretation in critical conditions - less noise, higher operator decision confidence.

2014 — 2021

Freelance · R&B Studio · in-house

Product Designer · Graphic Designer · Video Editor

Seven years of craft - from visual identities and marketing communications, through video editing, to the first product design projects. Worked with agencies and direct clients.

- **A full cross-section of visual disciplines:** branding, layout, motion, editing — today translating into an edge when designing coherent digital ecosystems.
- **Freelance work:** client, scope, and time management - competencies that today carry over into lead and strategic roles.
